

External Floor Graphics Social Distancing

Overview

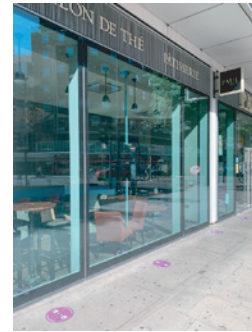

- ✓ 200 external floor stickers
- ✓ 35 internal floor stickers
- ✓ 2 day installation
- ✓ 2.6km Area

When producing these stickers we chose a size of 300mm DIA.

This was to make sure the stickers would be suitable for most pavements and street tiles.

This allowed us to avoid the joins, increase the longevity of the sticker.

Reducing the effects of moisture and dirt that can weaken the adhesive when floating over cracks & joins.

Working with our client and keeping an eye on guidance patterns and events in other countries. No distance was put on, future proofing the graphics from any government guidance changes.
